IBS Releases Intuitive SharePoint Application

DECEMBER 29, 2011, OAKBROOK, IL

Interactive Business Systems, Inc. (IBS) has developed and launched a Microsoft SharePoint-based Mergers and Acquisitions application for a multi-billion-dollar life insurance company based in Lansing, Michigan. This application replaces an old Notes application that had become cumbersome, unintuitive and inefficient at helping manage Mergers and Acquisitions. It needed to be replaced.

The company now has an intuitive application guiding the management of multiple acquisitions: prompting next steps, task status at the individual and group levels, access to associated documents, electronic confidentiality agreement compliance, security at all levels, and a clear break between due diligence/acquisition and merger activities and documents. This new application went live in November and was created offsite by IBS developers at its facilities in Livonia, Michigan.
